Royal International Language Schools

PROJECTS

Airline Data Analysis and Visualization Using Power BI

This project aims to analyze and visualize airline data obtained from kaggle.com to uncover trends and insights about the data. The dataset include variables such as Passenger ID, Nationality of passengers, Age, Airports, Flight Status, and Gender. To prepare the data for analysis added Age-Range. [GitHub Repository Link](#)

Data Cleaning of Shipment Dataset Using Excel

This project aims to clean a shipment dataset obtained from Kaggle.com, the dataset contains shipment details of a company. The dataset includes variables such as Segment, Ship Mode, Order ID, and Sales. [GitHub Repository Link](#)

Web Scrapping the Largest Companies in the USA Using Python

This project aims to use Web Scrapping to get the data of the largest companies in the USA from Wikipedia.org by using Python. Technologies utilized include **Anaconda**, **Jupyter Notebook**, **BeautifulSoup**, **requests**, and **pandas**. [GitHub Repository Link](#)

WORK EXPERIENCE

Sales Representative
EgyGamer, MOA

June 2020 - February 2021

Worked as a Sales Representative at EgyGamer for 7 months, and I acquired soft skills such as communication, time management, and teamwork. I effectively managed customer inquiries, resolved issues promptly, and collaborated with team members to meet sales targets. My work at EgyGamer provided me with valuable insights into customer relationship management and sales strategies
