DATA ANALYST

Recent Business Information System graduate with a specialization in Data Analysis. Proficient in Excel, Power BI, SQL, Python, HTML, CSS, and Javascript. With hands-on experience in data visualization and database management. Known for hard work, analytical thinking, and attention to detail. Seeking an entry-level Data Analyst position to leverage my skills, contribute to impactful projects, and continue advancing my expertise.

EDUCATION

Bachelor In Business Information System   **2020 - 2024**
Canadian International College, Sheikh Zayed   **GPA 3.45**

PROJECTS

Airline Data Analysis and Visualization Using Power BI

This project aims to analyze and visualize airline data obtained from kaggle.com to uncover trends and insights about the data. The dataset include variables such as Passenger ID, Nationality of passengers, Age, Airports, Flight Status, and Gender. To prepare the data for analysis added Age-Range. GitHub Repository Link

Data Cleaning of Shipment Dataset Using Excel

This project aims to clean a shipment dataset obtained from Kaggle.com, the dataset contains shipment details of a company. The dataset includes variables such as Segment, Ship Mode, Order ID, and Sales. GitHub Repository Link

Web Scraping the Largest Companies in the USA Using Python

This project aims to use Web Scraping to get the data of the largest companies in the USA from Wikipedia.org by using Python. Technologies utilized include **Anaconda**, **Jupyter Notebook**, **BeautifulSoup**, **requests**, and **pandas**. GitHub Repository Link

WORK EXPERIENCE

Sales Representative   **June 2020 - February 2021**
EgyGamer, MOA

Worked as a Sales Representative at EgyGamer for 7 months, and I acquired soft skills such as communication, time management, and teamwork. I effectively managed customer inquiries, resolved issues promptly, and collaborated with team members to meet sales targets. My work at EgyGamer provided me with valuable insights into customer relationship management and sales strategies
